

Impressive kick-off in Sweden

65 Inner Wheel members from the Swedish board and the nine districts have met for a longed for physical meeting. It was in Skövde (southwest of Sweden), that the annual National Information Meeting now could be arranged as usual after a long period of corona restrictions. It became a real kick-off with discussions around several important themes. "Restart and re-ignition in district and clubs" was one interesting subject presented by Lilian Bergholtz and Gunilla Blomqvist from Linköping IWC. Another important issue was how to increase the cooperation with the Inner Wheel countries in Europe. PIIW President Caterine Refabert participated on the net. She shared her international experience and stimulated the participants with ideas for future activities. She ended her speech with: We need new members to survive! The well-organised meeting was led by the new Swedish president, Gertie Stenkula, Lund IWC together with the Executive Committee.
